

A SNAPSHOT RECORD OF THE PATIENTS' TOTAL WAITING TIMES IN ACCIDENT AND EMERGENCY

The waiting time for patients in A & E department is made up of three elements:

1. Waiting to see the doctor in the first place.
2. Waiting for tests and assessment to be carried out for diagnosis
3. Waiting to go onto the ward after the doctor has decided the patient needs to be admitted to hospital.

Casualty Watch is a monthly snapshot of the total time spent by patients in A & E. The official data published by the Department of Health currently relates only to the third waiting period – the number of trolley waits over 12 hours. This data is used as one of the parameters to award Star Ratings to NHS Trusts. CHCs have long felt that the total wait for patients needs to be recorded. Unless the real experience of patients is used to judge the performance of the NHS, it is difficult to make sure improvements are real for patients.

We are pleased to note that the Department of Health has recognised this by:

- Starting to collect data on the total wait experienced by patients
- Setting a target for total waits of not more than four hours by 2004
- Funding the Emergency Care Collaborative to help deliver this
- Using the total wait time to award star ratings from next year.

To: All Participating CHCs and other Colleagues concerned with Quality of Emergency Services

Subject: Casualty Watch for the 28th April 2003

From: Mary Arayo, Casualty Watch Co-ordinator

HOSPITAL NEWS ROUND UP

Homerton Hospital

Casualty Watch visitor, Joy Vollmer, from City & Hackney CHC reported that A and E department was extremely busy and the four hour targets were not being met.

Royal Surrey County Hospital

Dr. Noel Mowat, the visitor from South West Surrey CHC, reported that the department was extremely busy due to numerous patients arriving by ambulance. There were many trolleys in corridors.

Selly Oak Birmingham

D.E. Spilsburg, of South Birmingham CHC, reported that the department was very rushed during his visit.
